

Author Contribution Form

Cardiovascular Imaging Asia (CIA) is a professional, peer-reviewed journal covering all aspects of cardiovascular imaging (echocardiography, cardiac computed tomography, cardiac magnetic resonance, cardiac radionuclide imaging, molecular imaging, and others). Individuals claiming authorship should meet all four of the following criteria.

- 1) Substantial contributions to conception and design, acquisition of data, or analysis and interpretation of data.
- 2) Participation in drafting of the article or critically revising it for important intellectual content.
- 3) Responsible for final approval of the version to be published.
- 4) Agree to be accountable for all aspects of the work and ensure that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

Each author should have participated faithfully in the work to take public responsibility for appropriate portions of the research. Allowing one's name to appear as an author without having contributed significantly to the study or adding the name of an individual who has not contributed or who has not agreed to the work in its current form is considered a contrariety of appropriate authorship. Ghost-writing is NOT acceptable. No one, other than the authors listed below, should have contributed substantially to the writing and revision of the manuscript. Contributors who do not meet the criteria for authorship should be listed in the acknowledgment.

Please type each author's LAST NAME next to the appropriate category.

- 1) Study conception and design:
- 2) Acquisition of data:
- 3) Analysis and interpretation of data:
- 4) Drafting of manuscript:
- 5) Critical revision:
